

# North Dakota Comprehensive Tobacco-free Parks

**BreatheND**  
Saving lives, saving money. The voice of the people.

More North Dakota communities are following a national trend of going tobacco-free in their public parks. Tobacco-free parks are cleaner, greener and safer places for families to enjoy healthy recreation, and they set an example that will help keep the next generation free of all forms of tobacco. 17 cities in North Dakota currently have tobacco-free park policies. If you'd like to help make your parks tobacco-free, contact your local public health unit at [www.breathend.com](http://www.breathend.com).
